Description:
Magnetic Track Bluetooth Speaker

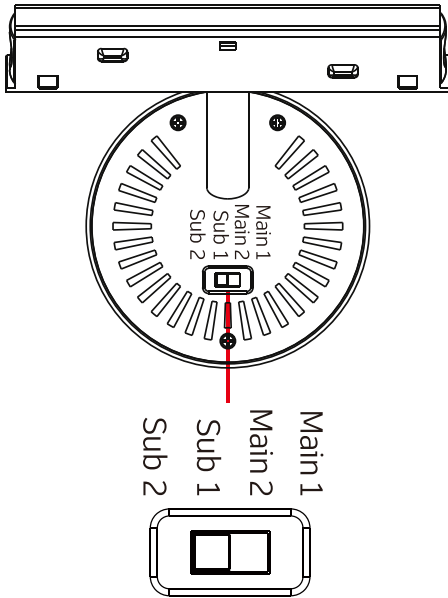

Main material:
Iron + PC

Specification:
1. Easy magnetic track installation, adjustable sound angle
2. Support multi-speaker synchronous playback for uniform background music
3. Low heat & energy saving, long-time stable operation

Applications
. Living Room
. Home Theater Room
. Office
. Bedroom

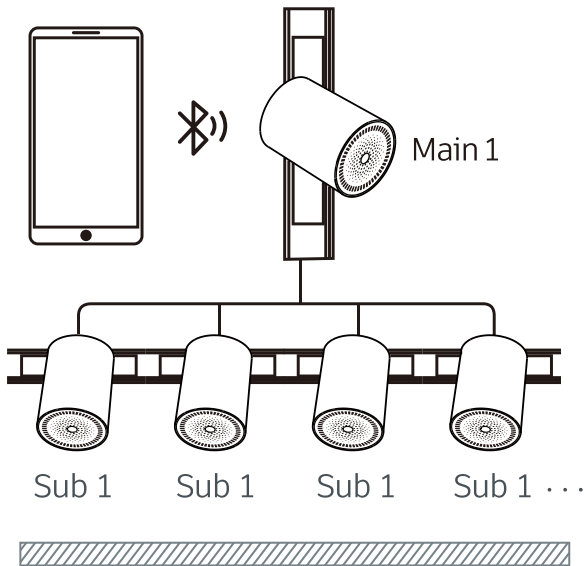

Main and auxiliary sound broadcasting and regional network grouping

Operating steps

Equipment configuration

1. Determine the Main device: select a device and switch its toggle switch to Main 1 or Main 2.
2. Configure the secondary devices: For the remaining devices that need to be synchronized for playback, set the toggle Switch to Sub 1 (Matches main 1) or Sub 2 (Matches main 2) mode based on the main device mode.

Bluetooth connection:

1. Turn on the Bluetooth device corresponding to the main device (such as a mobile phone), Search for available devices, The Main 1 displays the S3-1 name, The Main 2 displays the S3-2 name, Click to connect, the pairing code is "0000".

2. After the connection is successful, play music on the Bluetooth device, and all the Main and Sub devices that are successfully linked will play in sync.

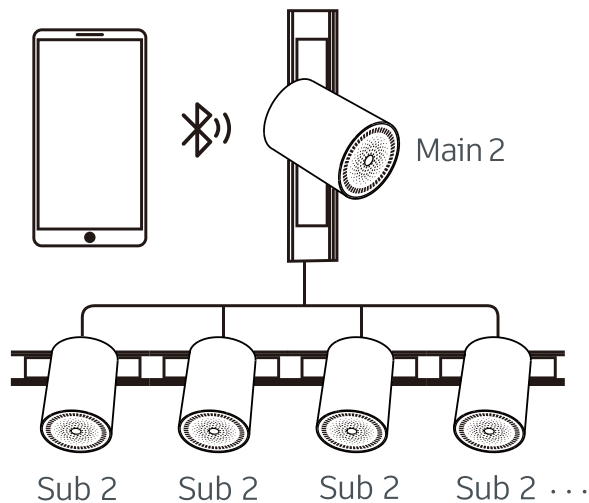

3. After the first successful connection, when the track Bluetooth speaker is powered on subsequently, it will automatically connect to the last connected track Bluetooth speaker.

Note:

1. The network is strictly based on the Main-Sub mode correspondence (Main 1 to Sub 1, Main 2 to Sub 2.)

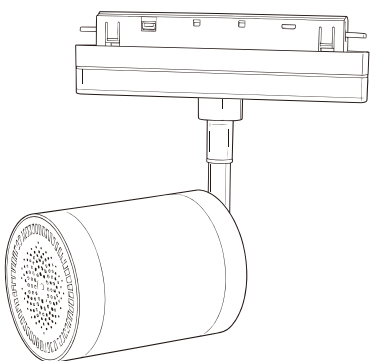

2. Bluetooth connection: if the device cannot be searched, you can try restarting the speaker and Bluetooth device, or check if the device is in a searchable.

3. Fault handling: If you encounter connection abnormalities or other faults during use, restart the device and reconnect first; if the problem still persists, please contact sales service for support.

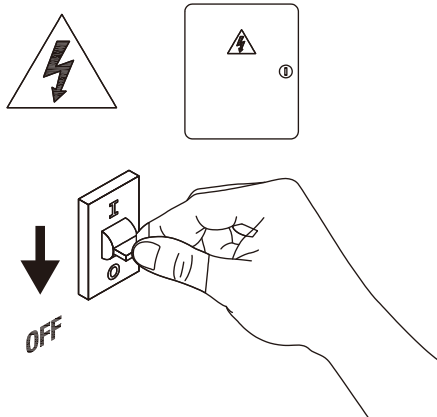

Warm tips:

1. The best sound quality effect is achieved when the track Bluetooth speakers are spaced 1-1.5m apart;
2. track Bluetooth speakers must be used at the rated voltage;
3. Do not block the Bluetooth connection when it is connected, so as not to affect the Bluetooth signal

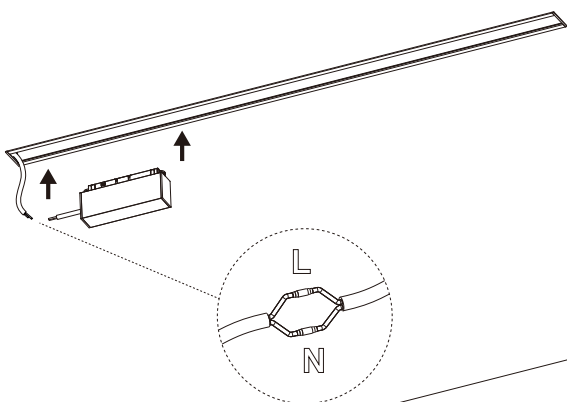

1

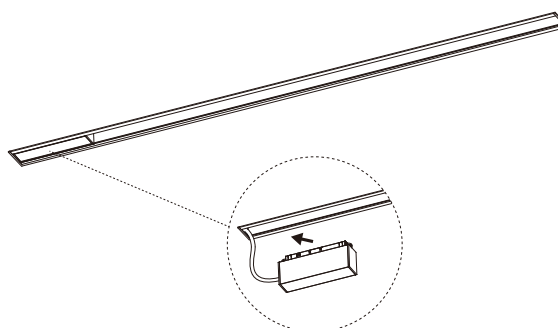

2

Turn off the power

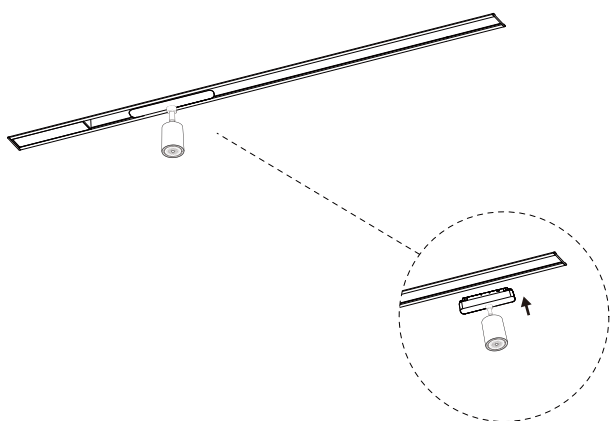

3

connect the cable

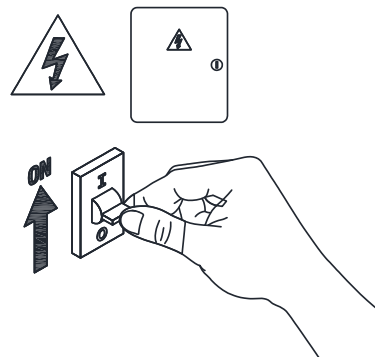

4

Install DC48V power supply

5

Install lamp the Installation is complete

6

Turn on power
